

# CARBONIZED FIBER

The unique **Steiner CF™** fabrics are made of a revolutionary blend of high performance, non-flammable, carbon based fibers blended with durable Para-Aramid strengthening fibers. **CF™** products are flame resistant, tough, lightweight, breathable, flexible and comfortable.

**CF™** fabric is formulated utilizing a blend of oxidized polyacrylonitrile fibers that are flame resistant and have exceptional electrical resistance, with Para-Aramid strengthening fibers that improve abrasion resistance, wash durability, cut resistance, and allow **CF™** products to maintain strength and flexibility.

**NEW!**

## CF™ Series 30" Welders Jacket

- Black woven **CF™** fabric
- Sewn with Nomex® thread
- Adjustable stand-up mandarin style collar
- Anodized, non-reflective snaps
- Relaxed full cut fit with elongated front
- Adjustable snap cuffs

- Snap front closure

S -13600      XL -13603  
 M -13601      2XL -13604  
 L -13602      3XL -13605

**NEW!**

## CF™ Series Apron

- Black woven **CF™** Fabric
- Neck strap with adjustable waist straps

24" W x 36" L  
 -13625

**Woven**

## CF™ Series Woven Sleeves

Woven **CF™** sleeves significantly increase protection from sparks, spatter, and flame in light to medium welding applications. Available in 18" or 23" length, standard or wide band elastic, and also extra wide width.

### Wide band elastic style

Sleeve Length	Standard Width	Wide Width
18"	13118	13118W
23"	13123	13123W

### Standard inside elastic

Sleeve Length	Standard Width	Wide Width
18"	13318	13318W
23"	13323	13323W

**Knit**

## CF™ Series Knit Sleeves

Knit **CF™** sleeves significantly increase thermal protection in high heat applications. Available in 18" length, two styles: Straight sleeve (worn over shirt or jacket sleeves), or Sleeve with thumbhole (worn on arms).

18"      Straight Sleeve      13618  
 18"      Sleeve with Thumbhole      13618T
